Nodak Neighbor

Official Publication of the
Nodak Electric Cooperative, Inc.

746-4461 or 800-732-4373

www.nodakelectric.com

The Nodak Neighbor (USPS 391-200) is published seven times a year, Feb., March, April, June, August, Oct. and Dec. for \$1.00 per year by the Nodak Electric Cooperative, Inc., 4000 32nd Ave. S., Grand Forks, N.D. 58201-5944. Periodicals postage paid at Grand Forks, N.D., and additional mailing offices. POSTMASTER: Send address changes to NODAK ELECTRIC COOPERATIVE, INC., P.O. Box 13000, Grand Forks, N.D. 58208-3000.

Volume 59, No. 2
March-April 2009
Officers and Directors

Chairman of the Board..... Roger Diehl
Vice Chairman..... David Kent
Secretary/Treasurer..... Steven Smaaladen
Directors..... Donna Grotte, David Hagert,
Doug Lund, Lee McLaughlin,
Paul Sigurdson and Harvey Tallackson
President & CEO..... George Berg
Editor..... Duane Hafner

Voting by mail

Your Bylaws state that any member may vote by mail for directors, and the absentee ballot or procedure for requesting the absentee ballot shall be mailed with the notice of the annual meeting (Bylaws, Article II, Section 6).

Candidates wishing to run for the Nodak board of directors have two options to have their name placed on the ballot. They can have a petition signed by 15 members to have their name placed on the ballot, or they can ask to be nominated by a Nominating Committee that meets roughly 45 days prior to the annual meeting. This year, there were no members who filed a petition to be placed on the ballot, and only the three incumbent directors requested to be placed on the ballot through the Nominating Committee. As a result, we have uncontested elections for each of the three district positions up for election at this year's annual meeting.

In view of the fact that the election will be uncontested, we have not mailed ballots and return envelopes for the election. In past years, when an election is uncontested, there has been a motion from the floor to cast a unanimous ballot for the three candidates. Nonetheless, you are entitled to vote by mail, and we will honor that right if you so wish.

If you want to vote by mail, feel free to call our office at 1-800-732-4373 or 1-701-746-4461 and ask to have an absentee ballot sent to your address. Better yet, we hope you will take the time to come to the annual meeting on April 4. We have a great year to report on, several door prizes to hand out, and we'll have a fantastic complimentary meal following the meeting.

ENERGY  EFFICIENCY

Tip of the Month

Unplug electronics when not in use. These items use energy even when not being used. Make sure to put your computer in the "power management" mode and turn off at night. Laptop computers typically use less energy than desktop models.

Source: U.S. Department of Energy

E-billing We now accept MasterCard, as well as Visa!

E-billing is an online tool, which allows you to view and pay your bill through the Internet. To learn more about the E-bill option, visit our Web site at nodakelectric.com. Click on "Programs and Services," and then select "E-bill." If you are interested in using the E-bill option, just follow these few steps:

- Have your Nodak account number ready
- Select highlighted option "Click here to enter E-billing"
- Select "If you are a new user"
- Fill out the appropriate information, name, account number, etc. and select "Submit"

It's that easy and you're on your way to accessing your account. If you have any questions, please feel free to call our offices at 701-746-4461 (toll-free 1-800-732-4373) or e-mail us at nodak@nodakelectric.com.

George Berg
President & CEO

Facility charge: a fair and equitable way to recover fixed costs

Without a doubt, the most despised part of our electric bill is the facility charge. This is the part of your bill you pay each month, even if you don't use any electricity. I was once told it is kind of like having a cover charge to come to Nodak and do business.

Facility or fixed charges with electric utilities are necessary for rate equity among ratepayers. For each of the 16,000 metering points in our service area, we make a significant investment, and we must maintain that investment to ensure reliability and safety.

We must also have a system of meter reading, billing and customer service functions in place to take care of customers. This system includes trained people, office facilities and state-of-the-art technology to provide the level of service expected by the general public.

The cost of all of these facilities and services must be maintained, even if you elect not to buy any electricity during a specific period. The cost of these services are appropriately billed on a per customer, per month basis rather than in proportion to the amount of electricity purchased.

A common question is, "Why do some consumer classes pay a

different facility charge than others?" The answer is that required facilities tend to differ among different consumer classes.

In high-density urban areas, accounts require less distribution line per account, and they are typically served with multiple accounts per transformer. For this reason, urban accounts require a lower monthly facility charge than rural accounts. Commercial accounts require large transform-

"... the facility charge is an average of the cost to provide facilities for all consumers. It covers the cost of owning, maintaining and supporting these facilities."

ers, more expensive metering, and often require three-phase service and specialized equipment. For these reasons, commercial accounts require a higher monthly facility charge than residential accounts.

Following our recent rate increase, one member asked why his facility charge increased when nothing changed at his account. The answer is that the facility charge is an average of the cost to provide facilities for all consumers. It covers the cost of owning,

maintaining and supporting these facilities. The total of these fixed costs does, in fact, increase every year, and this component of our rate needs to be periodically adjusted.

Roughly 10 percent of our annual revenue is billed through the facility charge. If we eliminated the facility charge, we would need to increase our rate per kilowatt-hour a proportional amount. While we would receive adequate revenue to pay all of our expenses, there would be some consequences.

Those who use at or near average consumption would see little change in their total bill. Minimal users would be getting a free ride, as they would be paying little or nothing for the facilities serving their account, along with the billing and support required to serve their account. The free ride would be picked up by the larger users who would pay more than their share for these costs.

As you can see, it is our responsibility to not only have a facility charge in our rate structure, but to do the best we can to ensure it is designed to be fair and equitable among the different rate classes.

People you can trust ...

experience you can count on

These are the faces of your friends and neighbors who work at Nodak Electric and are dedicated to serving you. They are the people who keep your lights on and answer your energy questions.

We are look

Listed on the following page(s) are the names of past and present members of Nodak Electric that for the last six years have had unclaimed capital credits remaining on our books. In a six-year period, we have made numerous unsuccessful attempts to locate and reissue the capital credit checks to these members. To minimize administrative costs associated with continual publication of these unclaimed capital credit names, after a six-year unclaimed status period, these names will no longer be published and by Dec. 31, 2009, the remaining unclaimed capital credits for the names listed on these pages will revert back to the cooperative as contributed capital. If you recognize any names in this publication, or on the unclaimed link of our Web site, please have that person or their authorized representative contact our office for further instructions on how the unclaimed amounts may be retired. Thank you for your assistance.
