Board meeting

*First Tuesday
of each month*

Date first energized

Dec. 23, 1939

Power supplier

Minnkota Power Cooperative, Inc.

On the cover: An all-electric Chevy Bolt is plugged into a public charging station at Minnkota Power Cooperative headquarters in Grand Forks.

To the members of Nodak Electric Cooperative, Inc.:

You are hereby notified that the 78th annual meeting of Nodak Electric Cooperative will be held Thursday, April 12, 2018, at the Alerus Center, 1200 42nd Street South in Grand Forks beginning at 6 p.m., for the following purposes:

1. To pass upon reports covering the previous fiscal year, including acting upon reports of directors.
2. To elect three directors:

Listed below are candidates either nominated by petition or selected by the Committee on Nominations. The members of the Committee on Nominations are appointed by the board of directors.

District 1

(one 3-year term)

Paul Sigurdson, *Edinburg*
Thomas Vaughn, *Cavalier*

District 2

(one 3-year term)

Barry Brode, *Grand Forks*
David Hagert, *Grand Forks*

District 3

(one 3-year term)

Rhonda Allery, *Sheyenne*
David Brag, *Finley*
Doug Mohr, *Devils Lake*
Brett Salvesen, *Cooperstown*
Ben Vig, *Sharon*

3. To transact business that may come before the meeting.

Voting by mail. The board of directors has authorized the mailing, for the election of directors, each member an absentee ballot. Your ballot will be mailed to you prior to the annual meeting with a list of the candidates and a postage paid return envelope. Completed ballot must be received by Survey & Ballot Systems, an independent election service, no later than April 11, 2018, to be counted as a vote of the absent member.

Les Windjue, Secretary/Treasurer
March 19, 2018

Seated: Mylo Einarson, president & CEO.
Standing, from left: Steve Breidenbach, engineering manager; Dan Schaefer, line superintendent; Blaine Rekken, member/energy services manager; Tom Edwards, accounting/finance manager; and Kim Soper, executive assistant.

Staff

Message to our Members

There's an old saying that goes, the more things change the more they stay the same. In many respects, that exemplifies the spirit of Nodak Electric Cooperative. The electric industry has never had this level of change going on all at one time, and through it all we strive to remain that same valued energy partner you've come to know and trust.

The days of our industry being poles and wires as they say, is long gone. Today, we have smart homes, smart appliances, renewable energy, battery storage, web-enabled thermostats, electric cars and much, much more. Through all of this, we continue to find the best way to fulfill our members' needs and be your partner in providing the services our members want.

To that end, we initiated a new program in 2017 for electric vehicles. New electric vehicles entered into the program will get generous rebates, as well as low-cost, off-peak electricity. New electric cars, golf carts, forklifts, etc., that enroll in the program will benefit the member with low rates and cash rebates, and the rest of our membership will benefit through additional member sales overall.

Speaking of member sales, 2017 continued an overall trend of positive kilowatt-hour growth. Sales grew 5.4 percent despite the fact that it was a year where weather provided the optimal scenario for lower energy usage. A mild winter and spring, coupled with a cooler drier summer, meant our general service members had lower energy usage throughout the year. However, commercial and industrial usage increased through part of the year to bring annual patronage numbers over last year's sales.

Since 2014, we have been utilizing a deferred revenue program to help manage and stabilize your rates. Over that time, we have continued to retire capital credits while delaying the impacts of wholesale power rate increases by at least a year. In April of 2017, we increased our retail rates by 3.3 percent. That adjustment was the result of a wholesale power rate increase to Nodak 12 months earlier. Through the use of deferred revenue and a newly adopted financial management policy, we have been able to maintain a healthy, robust financial position while stabilizing rates for our membership.

That commitment to financial security

is one of several core areas where we remain steadfast in order to be your trusted energy partner. Safeguarding member information, meeting member expectations by providing tools and programs our membership desires and assuring we maintain a safe and reliable system are some others. Maintaining a reliable system takes hundreds of hours of planning, inspecting, testing and making system upgrades. Balancing reliability and affordability and matching that with member expectations means continuous improvement and looking ahead to anticipate your future needs.

One way we work to ensure your power system is reliable and affordable is by advocating on your behalf to state and federal legislators. We continuously monitor legislative issues in an effort to minimize any potential negative impacts they may have on our system and on your rates. In 2017, the Environmental Protection Agency's proposed regulations on carbon dioxide were repealed by the new administration, and a hopefully more feasible plan is set to come out in 2018. The burden of these regulations is something we closely monitor, as the impacts could have dramatic effects on your rates. As these regulatory frameworks are developing, we recognize the potential for living in at least a partially carbon-constrained world and continue to work with our wholesale power provider, Minnkota Power, and others to ease the burden compliance would have on our members.

As has been the case throughout most of the electric industry, change has also come in the form of changing leadership and changing personnel. We are happy to report that through this transition when seasoned, experienced and knowledgeable folks have moved on, we have been blessed with top-notch replacements who are eager and ready to rise to the challenge of keeping the lights on for our membership. Adapting to change has made us stronger over the nearly eight decades we've been here to serve you. It has given us the opportunity to focus on member needs and retain the trusted energy partner our members want from their cooperative.

Decades ago, electric cooperatives brought light to the darkness of rural America. Today our future is brighter than ever. We hope you will come to our annual meeting on April 12 and be part of shaping that future.

Paul Sigurdson

President & CEO

2017 CO-OP FACTS

Total operating revenue	\$103,044,861
kWh sold in 2017	1,115,063,956
Total miles of line:	
Overhead	3,898
Underground	4,282
Square miles	8,820
Metered services	19,651
Number of employees	64

Treasurer's Report

Les Windjue
secretary/treasurer

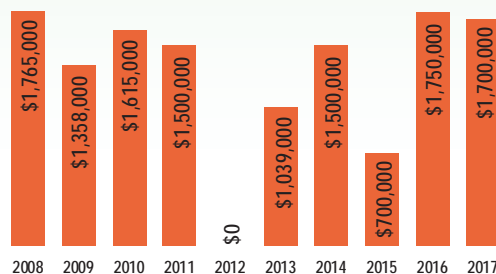

As Treasurer of Nodak Electric Cooperative, thank you for the opportunity to present the 2017 financial statements of the cooperative.

The financial year 2017 was a successful one for the cooperative. Unlike the year 2016, revenue, expenses and margins were very close to the budgeted value. All of our lenders' required ratios were met and we also met the more stringent policy driven financial management goals set by Nodak in early 2017. Revenue from electric sales totaled \$103 million. Power costs for 2017 were \$85.8 million. Total cost of electric service (less power costs) was 99 percent of the 2017 budgeted levels.

Margins for 2017 were audited at \$2,998,255. Of that amount, \$2,207,565 came from operating margins and the balance of \$790,690 from nonoperating margins.

For a more detailed look into the revenue, expenses and margins of your cooperative, please feel free to contact Nodak at your convenience.

Board of Directors

Seated, from left: Peter Naastad, Hatton; David Hagert, Grand Forks; Luther Meberg, Park River; and Paul Sigurdson, Edinburg. Standing, from left: Gerard Paul, Grand Forks legal counsel; Steven Smaaladen, Aneta; Les Windjue, Devils Lake; Cheryl Osowski, Grafton; Doug Lund, Aneta; and David Kent, Hatton.

Attention corporate members

If you are a member Corporation, Cooperative, School, Church or Township (or other nonnatural person) of Nodak Electric Cooperative, Inc., and want to be represented at members' meeting(s), please request a Designation of Voting Representative form and one will be mailed to you. The form must be completed and signed by an authorized officer of the organization. This form must be completed annually.

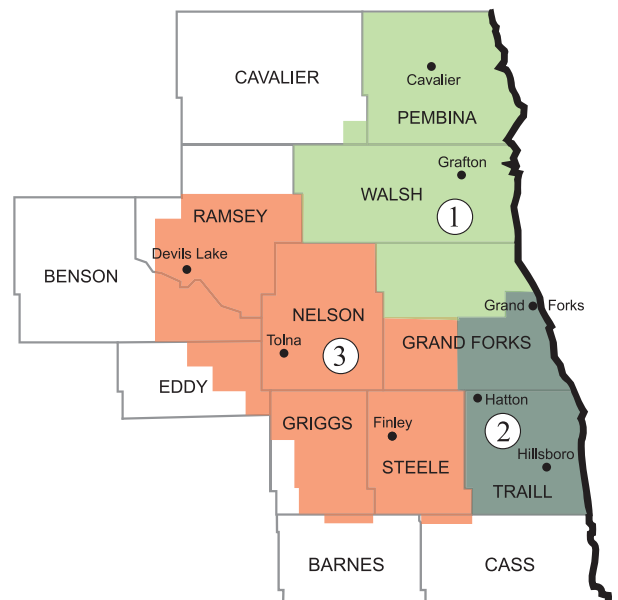

In order for the member corporation, etc., to participate in business matters, this form must be received by the secretary of Nodak on or before the date of the members' meeting(s). This form may be mailed with your ballot to Nodak or presented at registration at the members' meeting(s).

How to vote

Members may vote *in person* at the Alerus Center on Thursday, April 12, 5:00 p.m.,

– or –

by mail. Ballots will be mailed out to members a few days after receiving this Annual Report. Ballots must be received by Survey & Ballot Systems no later than April 11.

Board of Directors Candidates

District 1 Candidates

Paul Sigurdson
Edinburg, N.D.

Paul Sigurdson has served on Nodak's board for District 1 since 1991, and is currently serving as chairman. He also serves as vice president of the Square Butte Electric Cooperative board. He has completed the director courses offered by the National Rural Electric Cooperative Association to become a credentialed cooperative director and completed the board leadership program. A retired farmer, Paul serves as chairman of the board of directors of Edinburg Farmers Elevator. He is a member of N.D. Farmers Union, N.D. Farm Bureau and the Pembina Hills Lutheran Church. Paul and his wife, Ina, live on a farm near Gardar, N.D. They have four grown daughters, five grandsons and one granddaughter.

Thomas Vaughn
Cavalier, N.D.

Thomas (Tom) Vaughn is a Cavalier, N.D., native and fourth-generation farmer and rancher in Pembina County. With sons David and Craig, Vaughn Farms runs a diversified crop and purebred Limousin beef seed stock operation.

Tom has served on a variety of boards: Cavalier Presbyterian Church, Pembina County Livestock Association, Heartland Limousin Cattle Association, North Dakota Limousin Cattle Association, North American Limousin Cattle Association and the Cavalier Public School Board. Currently, Tom is vice president of the Pembina County Memorial Hospital board in Cavalier. His board philosophy is to hear all points of view, reach consensus and support the board's decisions.

Tom and his wife, Rita, have three sons and six grandchildren. Spending time with grandkids and traveling are highlights for Tom and Rita.

Tom has chosen to run for the Nodak board to support the work and stability of the cooperative.

District 2 Candidates

Barry Brode
Grand Forks, N.D.

Barry Brode, a Grand Forks, N.D., resident for nearly 40 years, recently retired from UND as Director of Television and Radio.

Throughout his career, Barry has worked with many students and a variety of programs, which included President Kennedy's communications team, UND Marketing Council, Staff Senate, Staff Senate Executive Committee and was a member of the leadership team for the Vice President of University and Public Affairs. He chaired the Studio One Executive Council and served on the Staff Senate Professional Development Committee.

He received a UND Meritorious Service Award, the Facilities Golden Hammer Award and earned the honor of being named Outstanding Division Employee. In addition, he provided leadership to professional staff members who helped Studio One achieve more than 750 awards for production, journalism and marketing.

David Hagert
Grand Forks, N.D.

David Hagert has been a member of the board of directors for Nodak Electric Cooperative since 1991 and has held numerous offices, including chairman. He has completed the required courses to receive the credentialed cooperative director certificate. He owns and operates AgriData, Inc., a web-based mapping software company that serves farmers, ranchers and agri-businesses on a national basis.

He currently serves on the North Dakota Atmospheric Resource board. He has served on the Emerado school board, the Emerado-Arvilla Lions Club, the Northwood Jaycees, the Grand Forks County Crop Improvement Association, the Grand Forks County Farm Bureau, the Grand Forks County Planning and Zoning Commission and was past treasurer of Pleasant View Township.

David and wife, Karen, have four grown daughters.

Rhonda Allery
Sheyenne, N.D.

Rhonda Allery, Sheyenne, N.D., currently serves as the director of Lakes Social Service District for Ramsey and Towner Counties. She has been a licensed social worker for more than 20 years, working with children and families. She currently serves on the Lake Region Community Shelter board, and was appointed by Gov. Jack Dalrymple and reappointed by Gov. Doug Burgum to serve on the Juvenile Justice State Advisory Group. Rhonda has served on the St. Olaf Lutheran Church council, taught Sunday school for several years and served on the Safe Alternatives for Abused Families board of directors. Rhonda and her husband, Jerry, live at Woodlake and have two children, Jace and Olivia.

David Brag
Finley, N.D.

David Brag is a lifelong resident of Finley, N.D. He has served in his community over the years as church council board member, park board member and is currently farming part time. He is a Class B electrician, and a retired crew foreman of Nodak Electric in Finley.

He is a graduate of Finley Public High School and obtained his degree from North Dakota State College of Science in Wahpeton, N.D.

His experience offers understanding of rural community needs, using a common-sense approach.

David and wife, Kathy, have three daughters. He loves spending time with their seven grandchildren.

Doug Mohr
Devils Lake, N.D.

Doug Mohr, Devils Lake, N.D., resident, is employed by Ramsey National Bank as the senior vice president of lending, serves on the bank's management team and board of directors. Prior to the banking business, Doug was self-employed as a real estate appraiser and continues to hold a certified general real property appraisal license. He currently serves on various boards, including the Lake Region Community College Foundation, Greater Ramsey Water District, Board of Adjustment - City of Devils Lake and formerly served on the Forward Devils Lake Development Corporation board of directors. A graduate of Minot State University with a bachelor of science degree in earth science and a graduate of the School of Banking, University of Wisconsin, Madison. Doug is married to Cecilia and has one son, Patrick, who is currently serving as a pilot in the United States Air Force.

Brett Salvesen
Cooperstown, N.D.

Brett Salvesen, Cooperstown, N.D., is the owner of Salvesen Ranch, a small cow-calf operation. He also works for Martens Farm, where he is involved in the farm's daily management decisions. He has attended classes at North Dakota State College of Science in business management.

Brett is involved in various local and statewide organizations such as the Griggs County Livestock Association, a voting member of Sons of Norway, Cooperstown, an active member of Young Republicans of North Dakota, the North Dakota GOP and a member of Saron Evangelical Free Church.

Ben Vig
Sharon, N.D.

Ben Vig, a Sharon, N.D. native, farms with family around Sharon. With a bachelor of science degree from Valley City State University, he continues the tradition of family farming by growing wheat, soybeans, edible beans and sunflowers. Ben is on the township board, Trinity Lutheran Church board, Aneta Farmers Union co-op board, a member of the Steele County Farmers Union and the North Dakota Oilseed Council. Previously, he was a member of the North Dakota Farmers Union board of directors in Jamestown from 2011-2013, and was a member of the North Dakota House of Representatives in 2007 and 2009. Ben and his wife, Megan, have one daughter.

Leading the charge

Electric vehicles gaining traction in ND

In 2017, an electric vehicle (EV) charging program became available for the first time to Nodak Electric members. This program is designed to save electric vehicle owners money through a lower electricity rate for battery charging units that are hard-wired and off-peak controlled. Read on for more information.

While it may have seemed futuristic only a few years ago, electric vehicles are beginning to gain traction in North Dakota. Rapid advancements in battery technology now provide drivers with cost-effective vehicles that offer 100 to 300 miles of range per each charge.

The ability to save money is one of the major draws of electric vehicles. Charging with electricity is equivalent to less than \$1 per gallon gasoline. If you participate in Nodak Electric's off-peak charging program, the cost could be less than 65 cents per gallon. Electric vehicles also require significantly less maintenance. There are no oil changes, belts, air filters, spark plugs or other parts that need occasional replacement in a gasoline-powered vehicle.

One big question for many consumers in North Dakota is how electric vehicles perform in cold climates. Both gasoline and electric vehicles have lower efficiencies at colder temperatures. For EVs, cold weather can impact the distance you can travel per charge by 25 to 50 percent. Larger batteries, however, have less performance loss issues. Still, today's EVs work well in cold climates. It is recommended that you store your EV in a garage during the winter and allow it to heat up while still plugged in. This will improve the battery range.

Nodak Electric members also get the satisfaction of knowing that they are charging with homegrown North Dakota energy. All of the electricity delivered to Nodak is generated by in-state resources, including coal, wind and hydro. By using electricity, you are supporting the cooperative that you own and the economy of your state.

Charging your EV

Charging times vary based on the vehicle and voltage of the charging station. Drivers

Top: The digital display inside the all-electric Chevy Bolt shows a variety of information, including battery life, efficiency and other statistics.

Insets: The Bolt is plugged into a public charging station in Grand Forks.

can charge their electric vehicles through a standard 120-volt outlet, although it takes significantly longer (15-20 hours) than other charging options. Using 240-volt service, a dead battery can be fully charged in approximately two to four hours. Lastly, Direct Current (DC) quick charging is available at some gas stations and along major transportation corridors. On average, the DC charger can add 40 miles of range for every 10 minutes of charging.

Installing a home charger

You'll charge your electric vehicle at home almost every day. Why not pay less every time you plug in?

The installation of a 240-volt charger qualifies you for a \$50 per kilowatt (kW) rebate (maximum \$500) and the money-saving off-peak charging rate. The off-peak program allows for the control of certain loads (most commonly heating and water heating) during periods of peak electrical demand. The financial savings realized by controlling loads are distributed back to the consumer through the off-peak electric rate, which is lower than the standard electric rate.

In exchange for the lower rate, electric vehicle charging times are limited to off-peak hours. During October through May, charging can be done from noon to 5 p.m., and from 11 p.m. to 7 a.m. In the summer months, charging is available from midnight to 10 a.m. With only a few hours needed to completely charge an empty battery, most consumers are not inconvenienced by the limited charging times.

Public charging on the rise

Public charging options are increasingly becoming available in North Dakota and Minnesota lakes country. According to www.plugshare.com, a national online charging station locator, there are approximately 18 public charging options in North Dakota, with more planned for 2018. The Detroit Lakes and Bemidji areas also feature multiple public charging stations.

In Nodak's service area, the new Minnkota Power Cooperative building features a free 240-volt charging station for public use.

Top: An electric forklift is used to move a pallet inside a Grand Forks warehouse.

Inset: (Left) An electric forklift charging station is ready for use. (Right) The digital display on the electric forklift's control panel shows the remaining battery life.

Energy services is here to help

If you have questions about electric vehicles or are interested in installing a charging station in your home or business, contact Nodak Electric's energy services team at 746-4461 or 800-732-4373. They will be able to assist with rebate questions and provide insight into technical requirements.

It all adds up!

Your \$6 per year donation makes a BIG difference!

Operation Round Up® is a program that rounds up members' monthly electric bills to the next whole dollar amount. The resulting funds are put into a special account to assist others in need. The funds collected through Operation Round Up are used for a variety of projects, programs and items throughout the Nodak service area.

The Round Up board meets quarterly and considers each application that has been received since the previous meeting. It awards funds to the applicants based on how well the application fits the original funding guidelines: 1. Individuals or families in crisis; 2. Services – ambulance and fire; 3. Community youth needs with emphasis on permanent benefit; 4. Scholarships with emphasis on re-education of displaced agricultural people; 5. Senior needs with emphasis on permanent benefit; and 6. No requests for funding of utility and space heating energy will be accepted.

Operation Round Up is a voluntary program with roughly 60 percent of the 14,624 members participating. Since the program started, a total of \$826,056 has been distributed to individuals and organizations throughout the Nodak Electric service area.
